

# Blow more than their socks off. The new Forge Active Bass System.

2100 PROGRAM WATTS • SERVO-LOOP ACTIVE TECHNOLOGY  
SPEAKER CAB WITH 3 BUILT-IN POWER AMPS • 7-TUBE PREAMP HEAD

## AXB Bass Tube Preamp Head Features:

- Four 12AX7 and three 12AU7 tubes
- Switchable Clean Tube or Classic Tube sound
- Active 5-band EQ with In/Out switch and +/-15dB boost/cut per band and freq sweeps at  
Sub: 20Hz to 100Hz; Bass: 30Hz to 300Hz;  
Mid: 200Hz to 2kHz; Treble: 1.5kHz to 15kHz;  
High: 5kHz to 20kHz
- Low Cut with 20Hz to 80Hz freq sweep & In/Out switch
- Input & Output Level controls with LED ladders
- Tube Compressor with Level control, In/Out switch & LED ladder
- FX Loop with In/Out & Pre/Post EQ switches
- Balanced Direct Out with Ground Lift, Mic/Line & Pre/Post Compressor switches
- Footswitch & Tuner Out jacks & Output Mute switch
- Rack mountable. Weight: 10.1 lbs

## AXB 4108 Active Tri-amped Bass Speaker Cabinet Features:

- Speaker cab has 3 built-in power amps with lightweight switching power supplies – 1,000 watt Sub amp, 800 watt Bass amp, 300 watt High-freq amp - 2,100 total program watts
- Dynamically dependent, signal processing design crossover systems between sub amp/bass amp and the bass amp/high freq amp
- Neodymium speakers - One 18" sub, four 10" bass, and three 5" high-frequency
- Servo-Controlled, Active Parametric Synthesis Technology delivers flat frequency response from ultra low 27Hz to high 10 kHz. This means drop-tuned 4-string, 5-string and 6-string basses on up have zero low-note fade outs, while keeping punchy mid-range and solid highs for strong "snap & pop" action
- Level controls balance the Sub amp and High-freq amp relative to the Bass amp to adjust to room acoustics
- 10" speakers switchable from crossed-over to full-range for single mic use. Also useful for bassists wanting more bottom end in the 10" speakers.
- Switchable crossover point of 75Hz or 150Hz between the Sub and the Bass power amps. This allows more bottom end in the 10" speakers (75Hz) or more bottom end in the 18" speaker (150Hz). Its a personal tone thing
- Peak Limiter switches the power amp peak limiter protection on/off
- Heavy duty casters, handles and tough Black Polymeric™ coating
- Tilt and roll design for easy portability – rolls through standard doors
- Light-weight 125 lbs (about 40lbs less than 8x10" passive bass speaker cabinets)

FORGE's AXB Active Bass Amp System is the first to utilize Servo-Controlled, Active Parametric Synthesis Technology controlling three power amps built into the speaker cabinet. This delivers flat frequency response from ultra low 27Hz to high 10 kHz, eliminating low-note fade outs on drop-tuned 4, 5 & 6-string basses on up, while supplying powerful mid punch and solid highs for strong "snap & pop" sonics. The 7-tube bass preamp head features a 5-band swept EQ.

Check out all the Forge Bass Amp Systems at [www.forgebass.com](http://www.forgebass.com). Proudly designed and manufactured in the U.S.A. A Division of XP Audio, Inc.
